1. Write a program that, given the type of vehicle ('c' for car, 'b' for bus, 't' for truck) and the hours a vehicle spent in the parking lot, returns the parking charge based on the rates shown below.

car: $2 per hour	bus: $3 per hour	truck: $4 per hour

Output:
Input type of vehicle: car (c) bus (b) truck (t): c
Input the number of hours: 6
You owe us: $12
Thank you for parking with us

2. A wholesale store gives a discount on the number of items purchased as shown below. Write a program that, given the quantity and unit price of an item, calculates the total price after the discount.

Quantity	Discount	Quantity	Discount
1 to 9	0%	50 to 99	5%
10 to 49	3%	100 or more	10%

Output:

Enter number of items: 30
Enter unit price: 10
Subtotal: 300
Discount: 9
Total: 291

3. Change (p55 ***Printing a grade from a score***) to create plus/minus grading based on the last digit of the score as shown below. Note that grade F has no plus/minus modifier.

last digit	0, 1, 2, 3	4, 5, 6, 7	8, 9
modifier	-	none	+

Output:
Enter a score between 0 and 100: 78
Score: 78
Grade: C+

4. Change (Chap 4 p83 ***Menu-driven calculator program***) to do calculations on floating-point numbers.

Output:
Menu:
1. Addition
2. Subtraction
3. Multiplication
4. Division
Select one of the operations (1, 2, 3, 4): 1
Enter the value of the first number: 2.7
Enter the value of the second number: 3.5
2.7 + 3.5 = 6.2
